One important recommendation

Your greatest competitive advantage isn't GoHighLevel—it's your **firsthand SSDI operational experience**. Before launching, document everything you know about:

- Lead Intake
- Qualification
- Filing
- Case Management
- Department Handoffs
- Common bottlenecks
- Manual administrative tasks

Turn that knowledge into Sharpened's own **SSDI Operations Framework**. That's intellectual property you own, and it's far harder for competitors to replicate than any individual software platform. As your business grows, that framework can become the foundation for your assessments, implementations, training, and marketing.
